DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over the patent DE 10061544 ("DE'544) in view of EP 2003-146826 (EP'826).*

DE'544 teaches crosslinked resin particles having an average particle size of 2-100 microns and comprising a copolymer formed from a monomer of acrylic ester.

DE'544 does not teach a surfactant of sulfonic acid or sulfonate group. EP'826 teaches the use of sulfonic acid group surfactant in order to improve the soft feel of a resin particle. It would have been obvious for one having ordinary in the art to incorporate the surfactant taught by EP'826 into the resin particles taught by DE'544 in order to obtain a soft, flowable resin particles.
